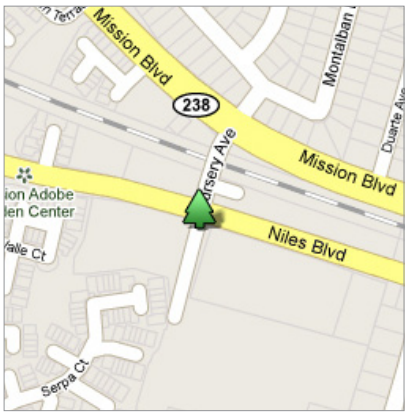
Brachychiton rupestris

Forest Kurrajong Tree

36501 Niles Boulevard
Niles District



Approximate location on map.

Produces bell-shaped flowers.

Photo Taken: July 2010

NIL-7 TREE INFORMATION/September 2010

HEIGHT: 30 ft.

SPREAD: 25 ft.

DBH: 2 ft. 3 in.

QUANTITY: 1

NATIVE TO: Australia

LAST INVENTORIED: March 17, 1972

As of September 2010, the only landmark Kurrajong Bottle Tree can be found in the California Nursery Company near the Vallejo Adobe.

This tree is a broadleaf evergreen native to Australia. It stands out among other landmark trees because of its odd bottle-shaped trunk that bulges at the base. This tree produces bell-shaped whitish flowers that appear around May to June, followed by canoe-shaped woody brown pods.[6]
